

## TEACHING

The Observatory of Grenoble offers a multidisciplinary teaching program in the Earth Sciences, Astronomy and Environmental Studies. Basic teaching is given at the undergraduate level and more specialized programs are offered at graduate level.

## CAREER OPPORTUNITIES

Petroleum, energy, minerals, storage of fluids and waste, water resources and water treatment, site rehabilitation, ocean science, environment management, natural and man-made risks; advisory boards and management in industry or government; development and maintenance of data-processing tools, instrumentation, space, civil engineering.

The Observatory of Sciences of the Universe of Grenoble is one of a small number of French institutes that monitors natural processes in earth sciences and astronomy.

Its favourable location in the French Alps provides an excellent site to study mountain belts and glaciers, the atmosphere and hydrosphere, and the planets, stars and other galaxies.

The Observatory is attached the University of Grenoble and closely associated with the European Synchrotron Research Facilities.

# Observatory of Sciences of the Universe of Grenoble

## University Degrees

### LICENCE (years 1 to 3 basic training)

3 curricula are offered

- Earth-Universe-Environment : basic principles of earth and environmental sciences
- Earth and life sciences for future teachers : basic natural science and teaching methods
- Dispersion of knowledge : earth and environmental science for external students and the general public

### MASTER (years 4 and 5) : 4 programs are offered

- Geology
- Geophysics
- Water and Environment
- Earthquake Engineering and Engineering Seismology (a European Erasmus Mundus program)

### DOCTORATE (years 6 to 8) : research training (PhD thesis)
